

D.B. Wright & Son
Established 1969

“ I have been using and recommending Top Grass Haylage for many years now and have not had a complaint yet. They provide us with a supreme product as well as a fast, reliable service. I would recommend Top Grass Haylage to any of my customers, and any horse owner who is concerned with the welfare of their animal. ”

Mr. J. Allsopp M.R.C.V.S. - Equine vet

Typical Analysis

Grass Type	Dry Matter (%)	Ash (%D.M.)	Protein (%D.M.)	Digestible Energy (Mj/Kg)	Neutral Detergent Fibre (%D.M.)
Ryegrass (Italian mix)	64	6.9	10.4	11	54.2
Perennial Ryegrass	67	6.3	9.1	10.4	60
Timothy/Ryegrass mix	65.8	6.2	10.8	11	57.7
Meadow	65.2	5.6	10.7	11	57.6

*Looking for Top
Quality Haylage?
Look no further than
Top Grass Haylage.*

“Quality & Service is our speciality”

Who Are We?

We have been producing haylage for eight years and have been supplying the equine market with quality hay for over thirty.

What Is Top Grass Haylage?

- High quality specialist forage for equine use.
- High dry matter silage product.
- Replacement for hay in the forage market.

How Is It Produced?

- The grass crop is cut, conditioned, tedded and then baled when the correct moisture level is reached.
- The bale is then wrapped and sealed to allow the fermentation process to take place.
- It is baled earlier than hay so it retains a higher percentage of the grasses nutrients.

Why Choose Top Grass Haylage?

- ✓ Top Grass Haylage is produced from only the finest quality grasses.
- ✓ No additives are used.
- ✓ Attention to detail is a priority.
- ✓ Each stage of production is carried out with our own specialised machinery.
- ✓ This enhances our quality control and gives us consistency in our end product.
- ✓ Top Grass Haylage is a dust-free product, so does not require soaking.
- ✓ Its high palatability ensures there is no waste.
- ✓ Due to its high moisture content the overall volume of Top Grass Haylage can look less than ordinary hay, so ideally haylage rations should be weighed before feeding.
- ✓ Top Grass Haylage can be stored outside helping to free up valuable space.

- ✓ We provide a variety of haylage made from different grass types including:
Ryegrass Timothy Meadow
- ✓ We guarantee every bale for quality and will exchange any bale that you are not completely satisfied with.
- ✓ We provide a fast, efficient & friendly delivery service, and your specific requirements can be discussed.
- ✓ The bales are analysed for their nutritional value, and from this feeding rates can be calculated.
- ✓ Individual batch analysis is available on request.
- ✓ Bale size is 80cm x 70cm x 120cm.

What Our Customers Say

“ We have been delighted with Top Grass Haylage, both in its nutritional value and cost effectiveness. There has been absolutely no waste whatsoever. All our horses are fed Top Grass Haylage and range from a thoroughbred stallion and broodmares, who are producing young stock for the race market to show horses; not forgetting of course our four veterans on the yard. ”

Colleen & Kerry Salmon - Willow Stables, Soham.
